## **ASUS Pretest Fixtures Pack Rev. 1.00**

[Copyright \(C\)](#) ASUSTeK COMPUTER INC. All Rights Reserved.

Please read this document carefully; it contains important information about the "ASUS Pretest Fixtures Pack (Rev. 1.00)". Topics include:

- Customer Benefit
- Customer Responsibility
- Package Contents

### **Customer Benefit**

Customers who have purchased the "ASUS Pretest Fixtures Pack" will obtain the advantage as shown below:

1. Process RMA pretest on-site.
2. Process troubleshooting efficiently.
3. Reduce NDF(No Defect Found) rate and save shipping cost.  
Save TAT(Turn Around Time). ASUS will keep auditing the return NDF rate monthly. If it keeps under 10%, ASUS will provide higher RMA priority and 10 working days of TAT for customers who have done the Pretest.
4. ASUS will provide one year non-periodical software update.

### **Customer Responsibility**

Any documents, software, fixtures or know-how, which relates to the "ASUS Pretest Fixtures Pack" are belong to ASUS confidential information. Customers must follow the items to purchase this package and then get the advantage from it:

1. Sign the NDA(Non-Disclosure Agreement) before purchasing it.
2. Following ASUS RMA return procedure and fill in the necessary documents to send the RMA products back to ASUS.
3. Provide test report to ASUS for future analysis.
4. All testing fixtures are forbidden to be resold.

### **Notice:**

*Customers who doesn't follow the instruction to fill in & provide the necessary documents won't get*

higher RMA priority. ASUS have the right to decide whether to stop providing software updates to customers.

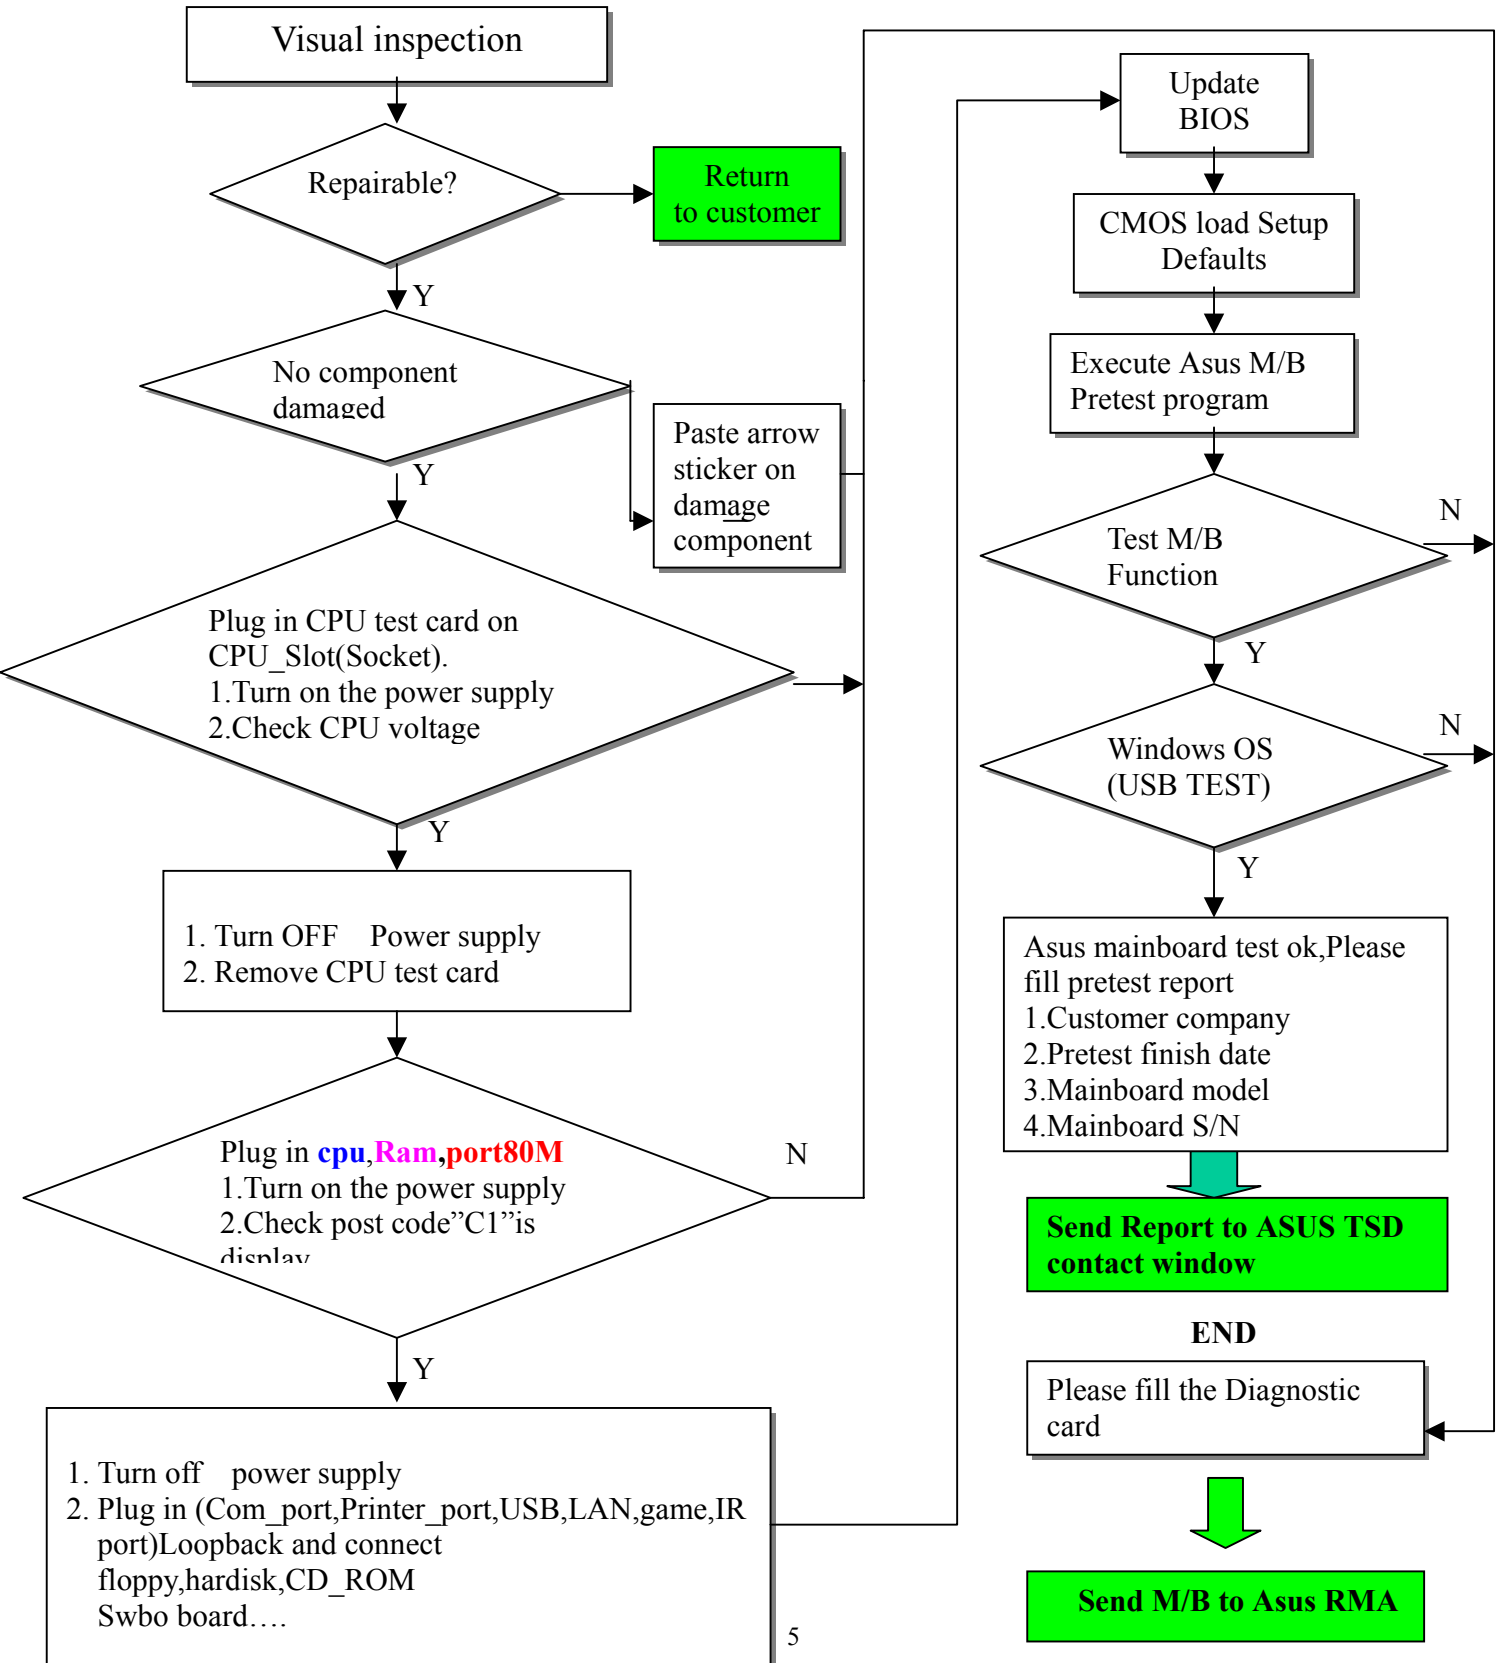

## Package Contents

<b><u>User Manual</u></b>		*1
<b><u>Test Program CD</u></b>		*1
<b><u>Test Fixtures</u></b>		
15-093004001	M017 CD-ROM TX97 Test CD	*1
22-060000210	CABLE 20P IDC (L:100mm)	*1
22-060000310	PGA 296P SOCK	*1
22-060000320	PGA 370P SOCK	*1
22-060001031	PGA 423P SOCK	*1
22-060001020	PGA 462P SOCK	*1
08-900006600	KLAMATH SIGNAL CARD (1.6m/m,2L,14*4.5cm )	*1
08-900009900	ENG_K7-S2K PIN TO NAME TEST (R1.00,4L,1.6mm,5670*2331 )	*1
20-521048260	IR LOOP BACK (1*5)	*1
20-521048270	IR LOOP BACK (2*5)	*1
20-521048280	LAN Fixture	*1
04-220150100	MR MODEM CARD WS-5614DML (SOFTWARE MODEM CARD FCC)	*1
20-201100075	ATX TO AT Cable	*1
22-060001280	AUDIO CABLE (HOUSING*3(BLACK))	*1
22-060001290	AUDIO CABLE ( HOUSING*1B+HOUSING*2W )	*1
70-C10G10-01	COM PORT-1 (REV1.00)	*1
70-C10G14-02	SWBO-OEM (REV2.00)	*1
70-C10G15-02	SWBO-ASUS (REV2.00)	*1
80-C1G002-0202	ENG_PRT (R2.02)	*1
80-C1G024-0100	ENG_GPORT_A (R1.00)	*1
80-C10G29-0100	PORT80M (R1.00)	*1

**WARNING!** Computer components are extremely sensitive to electrostatic discharge (ESD). Before handling any components, be sure to wear an anti-static wrist strap (not included) and touch a grounded object, like the your computer case or any other metal object, to release any built-up static charge.

## Customer Pretest flow chart

## Pretest operate description

1

**Visual inspection:**

1. Inspect M/B have broken,oxidized.....  
(Please refer **Visual inspection description**)
2. Customer induce or not.  
(Please refer **Customer Induce Description**)
3. If any M/B components failed to work after inspection,please paste the arrow sticker and write on Diagnostic Card

2

**If Visual inspection is OK.  
Please plug in the power connector on Motherboard**

3

**Plug in CPU test Card on CPU\_Slot(Socket) and  
Turn on power supply.**

**Check CPU voltage on CPU test card**

**Turn OFF Power supply and Remove CPU Test Card**

**Plug in CPU on Motherboard CPU Slot and CPU FAN connector**

**Plug in memory on Motherboard DIMM Slot**

**Plug in Port80M on Motherboard PCI Slot**

- 1. Turn on the power supply**
- 2. Check post code "C1" is display**

10

1. Turn OFF the power supply
2. Plug in PS2 Keyboard

11

Plug in PS2 Mouse

12

Plug in COM\_ports

**Plug in Printer\_port**

**Plug in Audio\_port**

**Plug in Audio\_port Loopback tail on Motherboard audio connectors**

**Plug in VGA\_port on Motherboard VGA Connector or VGA Card**

**16**

**Plug in Floppy,Hardisk and CD\_ROM on Motherboard Connector**

**NOTE:**

**Primary IDE connect Hardisk  
Secondary IDE connect CD\_ROM**

**17**

**Plug in SWBO\_ASUS on Motherboard Panel Connector**

**NOTE:**

**Orient the red markings on the PANEL ribbon cable to PIN 1**

**18**

Push (SWBO\_ASUS) the **PWR.SW** switch button once will switch on the system and test motherboard function.

19

# Visual inspect fail description

1

Visual inspection:

4. Inspect M/B have broken,oxidized.....  
(Please refer **Visual inspection description**)
5. Customer induce or not.  
(Please refer **Customer Induce Description**)
6. If any M/B components failed to work after inspection, please paste the arrow sticker and write on Diagnostic Card

2

Paste arrow sticker on damage component

3

Fill in the Diagnostic card

Paste Diagnostic Card on PCI Solt

Send M/B to Asus RMA

## ASUS TEST PROGRAM INSTALLATION GUIDE

### 1. Necessary equipments:

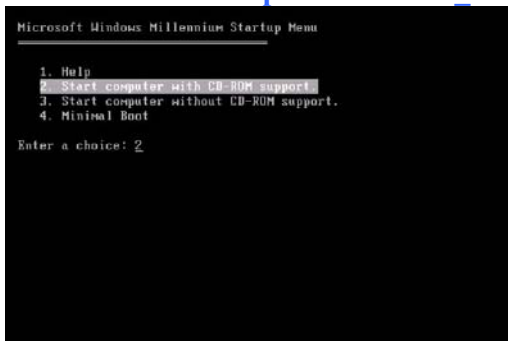

- Disk1(Boot disk) for Windows 98 or Windows ME
- Disk2 with Ghost v6.0 program
- Hard drive (at least 2GB)
- One PC with CD\_ROM

### 2. Load the Ghost image to the Hard Drive

- a. Get into BIOS Setup and set “Boot Sequence” to “A, C” (boot from floppy (A:))

- b. Restart and boot from FDD with Disk1 (Boot Disk).  
 c. Choose “start computer with CD ROM support”

- d. Change floppy to Disk2 (with “Ghost v6.0”).  
 e. Typing “ghost” to execute “Ghost” program.  
 f. Choose the options: ” Local → Disk → From Image”

- g. Choose “local drive”(CD\_ROM drive) to find out the image file.

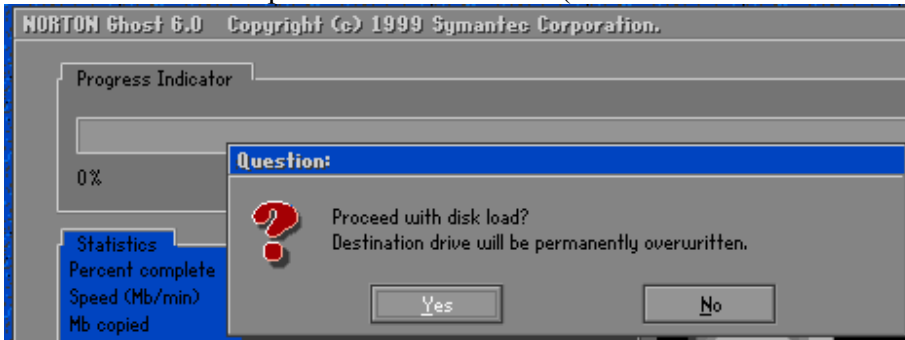

h. Press “Open” to load the image file.

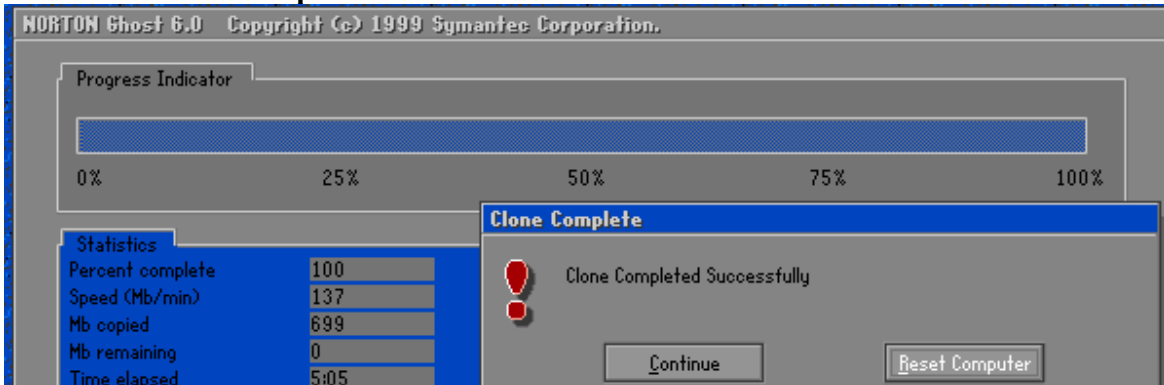

i. Select “local destination drive” and choose “OK”

j. Choose “YES” to proceed with disk load (transfer CD data to hard drive)

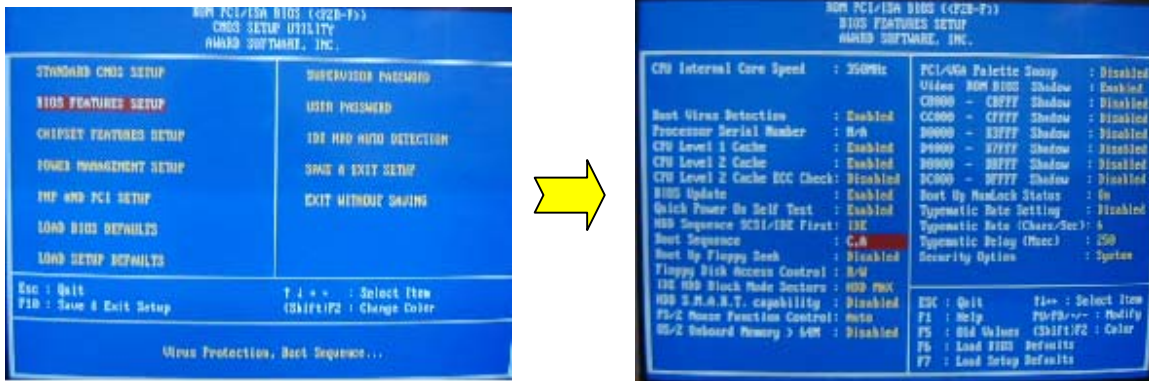

k. Choose “Reset Computer” to reboot.

l. Restart and change “Boot Sequence” to “C, A” (boot from hard drive(C:)).

m. If you can see the screen below, it means the data has been copied to hard drive successfully.

2. Visual Inspection should be implemented before Pretest.

3. Execute the Pretest Program

- a. Plug in the proper CPU voltage tools and check M/B power supply if it's OK.
- b. If the M/B voltage is OK, plug in all the M/B test fixtures and equipments such as CPU, Memory...etc.
- c. Power ON your test system and choose the “**HIMEM\_CDROM**” option

- d. Choose the motherboard hot key to execute the proper program for the motherboard series you want to test.  
For example: **P2B**, Please key in” **PB**” to execute the P2B series pretest program.

```

# Visual Inspection

## INSPECT BGA CHIPSET

**Check if the BGA chipset has been pulled out by end user.**

## INSPECT BGA CHIPSET

**Check if the M/B BGA chipset is lifted.**

## INSPECT M/B PCB

**Check if the M/B PCB is broken.**

## INSPECT M/B BACK PCB

**Check if the PCB trace is broken.**

## INSPECT CPU SOCKET

**Check if the PCB trace around the CPU socket is broken.**

## INSPECT M/B SLOT

**Check is any PIN on the SLOT is damaged**

# INSPECT SMD CHIPSET AND Capacitance & Register

**Check if any SMD chips, capacitance or register is damaged.**

# INSPECT M/B PCB

**Check if the M/B PCB is broken**

## INSPECT M/B COMPONENT

**Check if there is any component burnout.**

## INSPECT M/B PCB Oxidize

**Check if the PCB is oxidized.**

# Customer Induce Description

(If the motherboard belongs to "Customer Induce", it will be returned to the customer without repairing.)

## PCB Trace Scratched (1)

## PCB Trace Scratched (2)

**Consecutively three or more traces scratched**

## PCB Oxidation (1)

## PCB Oxidation (2)

**If the PCB is oxidized by end user.  
Ex: Drinks, coffee.....**

## PCB Breakage

**If the M/B PCB is broken by end user.**

## PCB Burning (1)

**If the M/B or VGA PCB is broken by end user.**

## PCB Burning (2)

**If there is any component burnout by end user.**

## Customer Induced

**Flaws caused by Customers Self-Repairing or removing parts from PCB.**

# **Test Tools Introduction**

## SWBO-ASUS

CONNECTOR

Name: **SWBO-ASUS**  
Part Number: **70-C10G15-02**  
Function: **Check message LED & Reset,SMI,Keylock, PWRON**

## PCI PORT 80M CARD

Plug in

Name : **PCI PORT 80M**  
Part Number : **80-C1PO40-01.02**  
Function : **POST Code Display**

# KLAMATH SIGNAL CARD (SLOT 1) CPU

Name : **KLAMATH SIGNAL CARD**  
Part Number : **08-900006600**  
Function: **check CPU Voltage&CPU Signal**

# K7 S2K-PIN TO NAME TEST (SLOT A) CPU

Name : **K7\_S2K-PIN TO NAME TEST**  
Part Number : **08-900009900**  
Function : **check CPU Voltage&CPU Signal**

## COM-Port Loopback

Name : **COM PORT-1oopback**  
Part Number : **70-C1OG10-01**  
Function : **Com-Port test**

## Printer Port Loopback

CONNECTOR

Name : **ENG\_PRT**  
Part Number : **80-C1G002-0202**  
Function : **Printer port test**

## ENG GPORT-A

CONNECTOR

Name : **ENG\_GPORT-A**  
Part Number: **70-C1G024-01**  
Function: **Game-Port test**

## AUDIO LOOP-BACK (3 Black)

CONNECTOR

Name : **AUDIO LOOP-BACK**  
Part Number : **22-060001280**  
Function : **AUDIO Loop-back test**

## AUDIO LOOP-BACK(2W+1B)

CONNECTOR

Name : **AUDIO LOOP-BACK**  
Part Number : **22-060001290**  
Function : **AUDIO Loop-back test**

## MR MODEM CARD

CONNECTOR

Name : **MR MODEM CARD**  
**WS-5614DML**  
Part Number : **04-220150100**  
Function : **Check AMR Interface**

## IR LOOP-BACK

CONNECTOR

Name : IR LOOP WS-5614DML BACK (1\*5)

Part Number : 20-521048260

Name : IR LOOP-BACK (2\*5)

Part Number : 20-521048270

Function : IR Loop-back test  
Yellow line-Pin 1

## LAN LOOP-BACK

Name : LAN LOOP-BACK

Part Number : 20-521048280

Function : LAN Loop-back test

## Socket 7 CPU Voltage Test Tools

Plug in

Name : **PGA 296P SOCK**  
Part Number : **22-060000310**  
Function: **CPU Voltage test**

## SOCKET 370 CPU Voltage Test Tools

Plug in

Name : **PGA 370P SOCK**  
Part Number : **22-060000320**  
Function: **CPU Voltage test**

## P4 CPU Voltage Test Tools

Plug in

Name : **PGA 423 SOCK**  
Part Number : **22-060001031**  
Function : **CPU Voltage test**

## SOCKET A CPU Voltage Test Tools

Plug in

Name : **PGA 462 SOCK**  
Part Number : **22-060001020**  
Function : **CPU Voltage test**

## CD-ROM Test Tools

**Name: M017 CD\_ROM TX97**  
**Part Number:15-093004001**

# M/B FUNCTION TEST

# CAUTION!

Please check Mainboard **JUMPER SETTING** before testing.

(1) **CPU frequency jumper setting:**

- a. **Jumper Mode:** Set the jumpers following the information printed on the motherboard or on the user manual.
- b. **Jumper Free Mode:** Make sure the JEN jumper is on the position of Jumper Free Mode and set all the DIP Switches to OFF.

(2) **Other Motherboard Function Setting :**

Check the onboard Lan ,Audio,SCSI...etc. jumpers and make sure they are **ENABLE** .

**PS:If the jumper doesn't be set properly, it'll cause test failure.**
